

Commencement of the Operation of Water Packing Station of drinking water

Date : February 24, 2019

The operation of water packing station of drinking water from the water purification station in the date factory has been started. The station provides the drinking water to the accommodation of the company employees in Kafaa project – Berber city, rather than procuring the water from the local market. The station has been constructed in accordance with the highest standards and specifications to achieve the health and safety standards at the lowest operational costs.
