

## **Cultivation of 700 of Banana Seedlings**

**Date :** February 12, 2019

The Africa Development Company "ADCL" has finalized the first phase of the cultivation of the 700 of banana seedlings that were produced in the company's tissue culture lab. This cultivation is with the highest specifications, quality, quantities and standards produced after finalizing the land reclamation, installation of Centre pivots and providing of fertilizers. Currently the company is working on increasing the quantity to 21 acres.
